Subject: Request for Domain Registration for My Portfolio Website

I am writing to request the registration of a domain name for my personal portfolio website. As a Web Developer I aim to showcase my skills, projects, and achievements on this platform to connect with potential employers, clients, and collaborators.

The domain name I am interested in is:

ayushmahat.com.np

I believe this domain accurately reflects my personal brand and professional focus. This website will also serve as a gateway for anyone seeking to understand my expertise and contributions to the field.

I am committed to ensuring that the domain is used responsibly and professionally. Please let me know the steps I need to follow to complete the registration process, including any additional information or documentation required from my end.

Thank you for your time and support. I look forward to your response and the opportunity to bring my portfolio vision to life.

Sincerely,
Ayush Mahat
